Technical information

AntiFoam F40®

Foam regulator (Additive)

Technical Data

Density at 20°C	1,02 g/cm^3
Viscosity at 20°C	10,7 mPas
ph-value at 20°C	7,0 at 100g/l
Boiling temperature	none
Explosion risk	none
Solubility in water at 20°C	11mg
Application temperature	20 - 45°C
Application	0° - 40°C
Storing frost-free	in original container
Disposal by EAK no.	59 301
WPC	1
VBF-classification	not applicable with this product

Applications

Additive for:	
kolb ContraFlux	++*

Process

	PowerSpray systems
	AirFlow systems

Water based pH-neutral silicone-free foam regulator for kolb cleaning detergents

Surface active single-compound antifoaming agent which can be rinsed residue-free

To be added, depending on water hardness, in a ratio of approx. 50 – 150 ml to a 10l ContraFlux detergent / water mix

Subject to regulations EG 648/2004 VO the product contains detergents: modified alcylphosphate

Please be aware: The product may irritate mucuous membrane, skin and eyes!

For commercial use only!

Part No.

Made in Germany

***++ = ideal for application, + = recommended, o = usable but not recommended, - = not recommended**
Note: The spreadsheet only shows a general overview of the cleaning media specifications. Rinsing with tap water with a too high lime conncentration may cause lime residues after drying. Cleaning tests are reasonable and necessary to determine the optimum cleaner configuration. Such tests may be carried out directly at the **kolb** Demonstration Center in Willich / Germany or can be initiated by contacting one of our international subsidiaries.
